

**JJSAMHP Overview for
LME/MCO Liaisons**

History of Juvenile Justice Substance Abuse Mental Health Partnerships (JJSAMHP)

- ▶ Solicitation to Local Teams in April, 2009
- ▶ Applications from each Team
 - LME (former name) Oversight
 - Had to involve JJ leadership
 - Had to have a Local Provider Network
- ▶ Key that JJ leaders are involved in planning and implementation (some teams had planning with just Provider/LME in past and JJ was "customer" as opposed to full Partner)

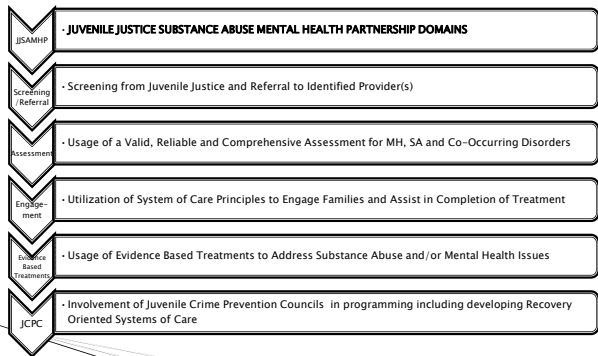

JJSAMHP History

- ▶ Completion of Substance Abuse and Mental Health Comprehensive Assessments
 - Team can use any valid, reliable, comprehensive assessment that has been evaluated upon advisement with DMH liaison
 - Why was GAIN chosen originally?
 - State level (DMHDDSAS) SAMHSA grant given to NC and study by Shelton and others at UNCG
 - GAIN found to be most comprehensive for youths referred for substance use, mental health & co-occurring disorders
 - Most consistent with CCA; crosswalked to CCA domains
 - Can readily generate reports that include ASAM criteria and most MH areas
- ▶ Use of Child and Family Team process
- ▶ Incorporation of Juvenile Crime Prevention Councils programming into the service array

JJSAMHP History: System of Care

- ▶ Family Driven & Youth Guided
- ▶ Child & Family Team Based
- ▶ Natural Supports
- ▶ Collaboration
- ▶ Community Based
- ▶ Culturally & Linguistically Competent
- ▶ Individualized
- ▶ Strengths Based
- ▶ Persistence
- ▶ Outcome Based & Data Driven

Screening Processes Across Teams

Assessment Tools Used by JJSAMHP Teams

JJSAMHP and LME/MCO Involvement

NC-TOPPS Adolescent Consumer Initial Data July, 2012- December, 2012

Selected Service Definitions	Percentage of those who Initiated Services Who <u>Are Identified</u> as Juvenile Justice Involved	Percentage of those who Initiated Services Who are <u>Not Identified</u> as Juvenile Justice Involved
Individual Therapy	65%	35%
Family Therapy	76%	24%
Group Therapy	63%	37%
Multisystemic Therapy	70%	30%
Level II Residential	62%	38%
Residential Treatment-Level III	49%	51%
Residential Psychiatric	42%	58%

Partnerships and the Roles of Technical Assistance and Stakeholders

- ▶ Partnerships (Stakeholders)–Focus on JJSAMHP is on local cross-systems change and not programs:
 - Does not supplant the role of the local system in crisis or urgent situations
 - Process Improvement Focus
 - Recognition that systems change takes approximately 2–5 years of work and requires commitment from the local team
 - Works to avoid the wrong perception of focus: "Referred to JJSAMHP" or "Designated Reclaiming Futures provider"
- ▶ Technical Assistance is provided to help local team in cross-systems change
 - The local team recognizes the needs/issues and does the "heavy lifting"

Technical Assistance: Effectiveness in one study of state teams

- ▶ Better results when team has a plan:
 - Consistently refers to the plan in working together
 - Consistently uses the plan in all processes
 - Consistently updates plan based on data and process improvement
- ▶ Teams who identify their own challenges and then seek out technical assistance for the challenges are more effective
 - When have a problem in an area and ask the TA to help in resolving the problem through research, linkage, etc.

Blase (2009): Technical Assistance to Promote Service and System Change

JJSAMHP LME/MCO Liaisons: Overall Monitor of Processes

- ▶ Does not mean everything is reliant on LME/MCO Liaison–JJSAMHP should be a partnership–all team members should be active in process
- ▶ Liaison **monitors** key domains and involves others (LME/MCO, TA, state partners) when needed
 - Screening and referral
 - Assessment
 - Engagement
 - Evidence Based Treatment Usage
 - JCPC Involvement
- ▶ Effective JJSAMHP processes actually make the work of the liaison easier over time

JJSAMHP LME/MCO Liaisons: Screening and Referral Process

- ▶ Monitor and advocate for an effective process for screening at JJ offices to referral to Provider(s)–written processes are more effective
- ▶ Monitor access issues and discuss (time, co-location, etc.) and use principles such as NIAtx
- ▶ Work with provider(s) and JJ to ensure that all direct care staff understand processes
- ▶ Ensure that there is a communication process back and forth between provider and JJ (consents, reports, etc.)

**Roles of LME/MCO Liaisons:
Assessment and Engagement**

- ▶ Assist team in monitoring System of Care principles and training for all partners
- ▶ Assist team in monitoring engagement (4 appointments within 45 days) and problem solve using principles such as outlined by NIAtx
- ▶ Assist team members in all being involved in engagement processes (e.g. provider changing hours, JJ helping with "no shows")
- ▶ Remind team of working on ways to include family and youth voice in planning and implementation
- ▶ Work with LME/MCO staff on barriers (such as timely funding, assisting with providers who have significant challenges, providing utilization data, etc.)

**JJSAMHP LME/MCO Liaisons
Evidence Based Treatment/Practices Usage**

- ▶ Advocate for use and identify appropriate EBTs in the area
- ▶ Provide for discussion of resources to build capacity for EBPs/EBTs in the local area
- ▶ Assist in access for EBT training provided within MCO for provider(s) and Evidence Based Practices (such as Motivational Interviewing) for JJ partners
- ▶ Work with MCO staff on gaps in EBT access for JJ youth and their families

**JJSAMHP LME/MCO Liaisons:
Juvenile Crime Prevention Council
Involvement and "Beyond Treatment"**

- ▶ Discuss involvement of JCPC team members in JJSAMHP
- ▶ Provide for discussion of service array issues across continuum
- ▶ Provide for discussion on "beyond treatment" activities and JCPC priorities

**What are Ways in which JJSAMHP
Teams Can Monitor their Progress?**

- ▶ Monthly Report: Monthly report that is supplied to state and regional partners and local sites
- ▶ NC-TOPPS: Individual data analyses on JJ youth can be provided to local teams upon request in District, County, LME/MCO levels available from 2010 to present
- ▶ Reclaiming Futures spreadsheet- developed by RF State Office allows teams to track monitoring level
- ▶ Provider or LME/MCO data-Use of Focus Groups, Consumer Surveys, Call Center aggregate information, UM aggregate information

NC Lessons Learned-Effective Teams:

- ▶ Local stakeholders are creative in trying to address system challenges on behalf of youth, families, providers, administrators, and funders
 - All team members working together including frontline
- ▶ Willing to engage in Process Improvement (using data and making changes)
- ▶ Willing to work together to resolve cross-system challenges
- ▶ Have written processes and Memorandums of Agreement that are followed and updated when needed

**JJSAMHP:
Focus on Fire Prevention vs. Fire Fighting***

- | | |
|--|--|
| <ul style="list-style-type: none"> ▶ What: Crisis situations “fires” ▶ Who: Anyone in the system who can address the immediate challenge ▶ How: Doing whatever can to problem solve youth getting into services immediately ▶ Where: Linking to actual programs and system (LME/MCO Access/Mobile Crisis, Treatment Agencies, JCPC crisis programs, Emergency CFT and Care Review meetings) ▶ When: Immediate and Urgent | <ul style="list-style-type: none"> ▶ What: Taking information from numerous “fires” seeing what needs to happen at a cross-systems level to improve services ▶ Who: Cross system planning team members and partners ▶ How: Use plans, data, processes, procedures, and stakeholder feedback to change systems ▶ Where: System level linkages to effective services through process improvement ▶ When: Longer term-systems change takes time |
|--|--|

Fire Fighting

Fire Prevention

*Thanks to D. McCain for analogy on Fire Fighting/Prevention

Main Functions of JJSAMHP teams

- ▶ *There are two essential functions that JJSAMHP teams appear to do:*
 - *Information sharing*—exchange of information between people, organizations, and systems
 - *Collaboration*— act of people, organizations and systems working together to produce an outcome

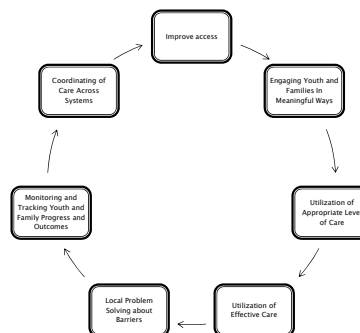

JJSAMHP - FY 2014-2015

- ▶ Use Reclaiming Futures theme “More Treatment, Better Treatment, Beyond Treatment”
- ▶ Asking local teams to review key areas
 - How are they doing now
 - How would they like to improve with concrete examples
 - LME/MCO support of the local team process is key to success and is a collaborative endeavor
- ▶ **More Treatment**
 - Valid and Reliable Screening Tool
 - Valid, Reliable, Comprehensive Assessment Tool
 - Child and Family Team/System of Care adherence

JJSAMHP - FY 2014-2015

- ▶ **Better Treatment**
 - Care Review Processes clearly outlined and accessible
 - Evidence Based Treatments for youth and families
 - Family and Youth Driven service delivery
 - Regular planning around youth and families guided by best practices (see NIATx example)
 - System of Care driven service provision
- ▶ **Beyond Treatment**
 - Broader physical healthcare system integration
 - Recovery Oriented Systems of Care including prosocial activities and natural supports
- ▶ **Encourage innovations in each area–must have LME/MCO support in these innovations–examples include:**
 - Working with Family Partners
 - Providing for incentives or Contingency Management
 - Using Assertive Engagement Practices or similar practices

Ways in Which JJSAMHP Teams Can Support the Work of the LME/MCO

Ways in Which the LME/MCO can Support the Work of JJSAMHP Teams

- ▶ Assist teams in problem solving and overcoming barriers
- ▶ Have leadership at table or open up opportunities for leadership discussion at key points
- ▶ Help teams access data (through Consumer Surveys, UM data, etc.)
- ▶ Advocate for Best Practices or Evidence Based Practices
 - Assessment
 - Treatment
 - System of Care
- ▶ Open up opportunities for teams through RFP/RFA to improve processes
- ▶ As these are locally driven, there may be many more examples

Thanks for Supporting Your local JJSAMHP teams!
